

CURRICULUM VITAE

Personal Data:

Gerard Anthony Luty, Ph.D.
G. Edward and G. Britton Durell Professor
Department of Ophthalmology
The Johns Hopkins University School of Medicine
Wilmer Ophthalmological Institute
M041 Smith research Building
600 North Broadway
Baltimore, Maryland 21287
Phone: 410-955-6750
FAX: 410-955-3447
email: gluty@jhmi.edu

Place of Birth: Pittsburgh, Pennsylvania, July 13, 1947

Citizenship: U.S.A.

Marital Status: Married, two children

Education and Training:

B.S. 1970, Catholic University of America, Washington, D.C., Zoology.

M.S. 1980, Catholic University of America, Washington, D.C., Microbiology,
Thesis: Isolation, ultrastructure, and numerical taxonomy of
autochthonous bacteria from bathypelagic fish intestine.

Ph.D. 1992, Johns Hopkins University School of Medicine, Baltimore, MD.
Cell Biology/Biochemistry, Biochemistry, Cellular and Molecular Biology
Program. Thesis: Characterization and purification of an inhibitor of
endothelial cell proliferation from normal adult vitreous humour.

Professional Experience:

Technician, Dept. of Ophthalmology, Johns Hopkins University
School of Medicine, 1973 - 1976. Biologist. Studied toxicity and metabolism of I69 dyes for possible use in retinal and choroidal angiography.

Research Staff, Dept. of Ophthalmology, Johns Hopkins University
School of Medicine, 1976 - 1979. Biologist and animal microsurgeon. Studied experimental angiogenesis and its inhibition.

Research Associate, Dept. of Ophthalmology, Johns Hopkins University
School of Medicine, 1979 –1986. Cell Biologist/Biochemist using cell culture assays and experimental angiogenesis models to evaluate angiogenic and antiangiogenic substances. Morphologic and enzyme histochemical studies on the development of the retinal vasculature and retinopathy of prematurity. Principal Investigator of studies to determine the feasibility of using hematoporphyrin phototherapy on ocular tumors.

Instructor, Dept. of Ophthalmology, Johns Hopkins University School of
Medicine, 1986 – 1992. Cell Biologist/Biochemist using cell culture assays and experimental angiogenesis models to evaluate angiogenic and antiangiogenic growth factors during purification. Immunohistochemistry was used to identify angiogenic and anti-angiogenic growth factors in diabetic and sickle cell retinopathies. *In vivo* and *in vitro* studies on the effects of low level microwave irradiation on the eye and brain.

Assistant Professor, Dept. of Ophthalmology, Johns Hopkins University
School of Medicine, 1992 – 1996. Cell Biologist/Biochemist studying angiogenic and antiangiogenic growth factors and the

Professional Experience (continued):

causes of vaso-occlusion in diabetic and sickle cell retinopathy. Also investigating normal vasculogenesis and abnormal angiogenesis in the canine model of retinopathy of prematurity and the role adenosine plays in these processes.

Associate Professor, Dept. of Ophthalmology, Johns Hopkins University School of Medicine, 1996 – 2005. Cell Biologist/Biochemist using cell culture assays, experimental angiogenesis models, immunohistochemistry, and *in situ* hybridization to evaluate angiogenic and antiangiogenic growth factors and their roles in diabetic and sickle cell retinopathies. Investigating the causes of vaso-occlusion in diabetic and sickle cell retinopathy. Also investigating normal and abnormal vasculogenesis in the canine model of retinopathy of prematurity and the role adenosine plays in these processes. Developing bioerodable polymer delivery of antiangiogenic agents and nonviral gene delivery systems for the treatment of ocular neovascularization.

Professor, Dept. of Ophthalmology, Johns Hopkins University School of Medicine, 2005 – present. Cell Biologist/Biochemist using cell culture assays, experimental angiogenesis models, immunohistochemistry, and *in situ* hybridization to evaluate angiogenic and antiangiogenic growth factors and their roles in diabetic and sickle cell retinopathies and age-related macular degeneration. Also investigating normal vasculogenic processes in retinal and choroidal vascular development and abnormal angiogenesis in the canine model of retinopathy of prematurity. Developing nanoparticles for delivery of antiangiogenic genes for the treatment of ocular neovascularization. Also using biosensors of oxidative stress to sense generation of oxygen

radicals and delivery of antioxidant genes to control the injury from oxidative stress.

RESEARCH INTERESTS

Angiogenic and anti-angiogenic growth factors: The involvement of angiogenic [adenosine, acidic and basic fibroblast growth factors (a and bFGF), vascular endothelium growth factor (VEGF)], stromal derived factor-1 and anti-angiogenic [transforming growth factor- β 's (TGF- β) and vitreous inhibitor of angiogenesis], thrombospondin-1, endostatin, and pigment epithelial-derived factor (PEDF) in vasculogenic and angiogenic processes in the eye using biochemistry, immunohistochemistry, enzyme histochemistry, *in situ* hybridization and *in vitro* cell assays. The vasculogenic processes of interest include development of the retinal and choroidal vasculatures. Angiogenesis is studied by the Luty lab in age-related macular degeneration (AMD), diabetic and sickle cell retinopathies, retinopathy of prematurity, and corneal neovascularization. Recent studies demonstrate that three antiangiogenic factors (thrombospondin-1, endostatin, and PEDF) are reduced or missing in AMD choroid and retinal pigment epithelium, making the AMD choroid susceptible to choroidal neovascularization.

Angioblasts or vascular precursors: We wish to determine the growth factors and substratum that drive the differentiation of angioblasts into endothelial cells within retina using immunohistochemistry, enzyme histochemistry, and *in situ* hybridization. We are determining how this process is affected by hyperoxia and hypoxia. We have developed *in vitro* systems to dissect the event using endothelial cells of adult and neonatal (angioblasts) retinal origin. We have shown that these cells are pluripotent and may be useful in delivering therapeutic genes to the eye.

Vaso-occlusion mechanisms that cause nonperfusion of the retinal and choroidal vasculatures in diabetic and sickle cell retinopathy and AMD. The mechanisms under investigation are imbalance in components of the fibrinolytic system, increased aggregation and adhesiveness of platelets, adhesion of sickled erythrocytes in sickle cell disease, and neutrophil adhesion to endothelium in choroid and retina.

Therapies for angiogenesis and oxidative stress in the eye. My lab is developing non-viral gene therapies for controlling angiogenesis in the eye using nanoparticles. We also have developed a biosensor for oxidative stress that will activate therapeutic genes in a cell only when the cell is experiencing oxidative stress.

EDUCATIONAL ACTIVITIES

Teaching:

CME Course: New developments in retinal disease and vitreous surgery.

Instructor, 1999-2000. "Future therapeutic targets."

CME Symposium. "Third International Symposium on ROP" 2003
Organizer and Instructor. "Large animal models of ROP."

Hematology training grant. Instructor. 2002-present.

Basic Eye Anatomy, Human Anatomy. 2000-present, Instructor.
"Clinical Correlations: Diabetic and sickle cell retinopathy"
Course Director: Mark Teaford, MD.

Department of Ophthalmology Residents Lecture, 2000-present, Instructor.
"Experimental studies in retinopathy of prematurity and sickle cell retinopathy "
"Choroidopathies"
Director: Peter McDonnell, MD

School of Public Health, Biostatistics and Medicine, 2002- present.
"Diabetic retinopathy"
Course Director: Sheila West. Ph.D.

Wilmer Day of Learning, Instructor 2002-present
"Anatomy of the eye."

Mentoring:

- 1.) Jingtai Cao, M.D., Ph.D. 09/94 – 09/97 - Wilmer Ophthalmological Institute
Baltimore, MD
Institute Attended: Third Hospital, Dept. of Ophthalmology
Beijing Medical University, Beijing, P. R. of CHINA
Degree received: Ph.D.
Degree awarded: 1994
Title of postdoctoral research project: "Choriocapillaris degeneration in
diabetes and its relationship to neutrophils."
Current Position: Research Scientist
Regeneron Pharmaceuticals, Inc.,
777 Old Saw Mill Rd., Tarrytown, NY

- 2.) Michaela Kunz(-Mathews), M.D. 10/94 – 05/97 - Wilmer Ophthalmological Institute, Baltimore, MD
Institute Attended: University of Vienna Medical School, Vienna, AUSTRIA
Degree received: M.D.
Degree awarded: 01/91
Title of postdoctoral research project: "Role of VEGF and adenosine during retinal vascular development and retinopathy of prematurity."
Current Position: Fellowship in Neuro-ophthalmology
Wills Eye Hospital
Philadelphia, PA
Mentor: Peter J Savino, MD.
- 3.) Ichiro Fukushima, M.D., Ph.D. 04/95 – 05/97 - Wilmer Ophthalmological Institute, Baltimore, MD
Institute Attended: Kansai Medical University, Dept. of Ophthalmology
Fumizono-cho Moriguchi-shi, Osaka 570 JAPAN
Degree received: Ph.D.
Degree awarded: 03/93
Title of postdoctoral research project: "Intrachoroidal neovascularization in diabetes"
Current Position: Chief of Service, Dept. of Ophthalmology
Kansai Medical University Hospital
10-15 Fumizono-cho Moriguchi
Osaka 570 JAPAN
- 4.) Makoto Taomoto, M.D., Ph.D. 7/97 – 6/99 - Wilmer Ophthalmological Institute, Baltimore, MD
Institute Attended: Kansai Medical University, Dept. of Ophthalmology
Fumizono-cho Moriguchi-shi
Osaka 570 JAPAN
Degree received: Ph.D.
Degree awarded: 1997

Title of postdoctoral research project: "TNF α induction of sickle RBC adhesion in retinal capillaries" and "Adenosine A2a receptor in retinal vascular development"

Current position: Staff Physician, Dept. of Ophthalmology
Kansai Medical University Hospital
10-15 Fumizono-cho Moriguchi
Osaka 570 JAPAN

5.) Tsuyoshi Otsuji, M.D., Ph.D. 06/99 – 06/01. Wilmer Ophthalmological Institute, Baltimore, MD

Institute Attended: Kansai Medical University, Dept. of Ophthalmology
Fumizono-cho Moriguchi-shi
Osaka 570 JAPAN

Degree received: Ph.D.

Degree awarded: 6/97

Title of postdoctoral research project: "Nitric oxide and sickle RBC retention in retinal capillaries"

Current position: Staff Ophthalmologist, Dept. of Ophthalmology
Kansai Medical University Hospital
10-15 Fumizono-cho Moriguchi
Osaka 570 JAPAN

6.) Sahng Yeon Kim, M.D. 06/01–2003. Wilmer Ophthalmological Institute, Baltimore, MD

Institute Attended: The Graduate School of Inje University College of Medicine
Pusan, KOREA

Degree received: M.M. Sc.

Date awarded: 02/95

Title of postdoctoral research project: "Diabetic retinopathy and choroidopathy in type 2 diabetic monkeys."

Current position: Research Associate with Dr. Gerard A. Luty
Funding source: Juvenile Diabetes Foundation subcontract through University of Maryland

- 7.) Imran A. Bhutto, M.D., Ph.D. 1/02 – present. Wilmer Ophthalmological Institute, Baltimore, MD
Institute Attended: Nagasaki University School of Medicine
Dept. of Ophthalmology and Visual Sciences
Nagasaki, JAPAN
Degree received: Ph.D.
Date awarded: 03/96
Title of postdoctoral research project: “Relationship of retinal pigment epithelium and choriocapillaris degeneration in age-related macular degeneration.”
Current position: Research Associate at Wilmer Eye Institute
Funding source: Foundation Fighting Blindness grant
- 8.) Carmen Mocanu, M.D., Ph.D. 02/02 – 02/03. Wilmer Ophthalmological Institute, Baltimore, MD
Institute Attended: University of Craiova School of General Medicine
Craiova, RO 1100 ROMANIA
Degree received: Ph.D.
Degree awarded: 11/96
Title of postdoctoral research project: “PEDF and VEGF in proliferative sickle cell retinopathy.”
Current position: Ophthalmologist, University of Craiova School of General Medicine Craiova, RO 1100 ROMANIA
Funding source: NIH-NEI RO1 grant # EY-09357
- 9.) Takuya Hasegawa, M.D. 09/03-5/06. Wilmer Ophthalmological Institute, Baltimore, MD.
Institute attended: Osaka University Medical School, Suita, Japan
Degree received: M.D.
Degree awarded: 03/96
Title of postdoctoral research project: “Development of the human choriocapillaris.”
Current position: Ophthalmologist, Osaka University, Japan
Funding source: Bausch and Lomb Japan Fellowship

- 10.) Tarl Prow, Ph.D. 02/04-04/07. Wilmer Ophthalmological Institute,
Baltimore, MD.
University of Texas Medical Branch, Galveston, Texas
Department of Pathology
Degree received: Ph.D.
Degree awarded: 01/04
Title of postdoctoral research project: "Nanoparticle delivery of therapeutic
genes for inhibition of angiogenesis."
Current position: Postdoctoral fellow, University of Queensland, Brisbane,
Australia
Funding source: Hematology Training Grant
- 11.) Takayuki Baba, M.D. 10/07-4/10. Wilmer Ophthalmological Institute
Baltimore, MD.
Tokyo Medical University Department of Ophthalmology
Degree: M.D.
Degree awarded: 1/19/05
Title of postdoctoral research project: "A new model for exudative age-
related macular degeneration."
Current Position: Postdoctoral Research Fellow in Gerard Luty lab.
Funding source: Bausch and Lomb Japan Fellowship
- 12.) Malia Edwards, Ph.D. 9/09-present. Wilmer Ophthalmological Institute
Baltimore, MD.
Title of postdoctoral research project: "Mouse models of persistent fetal
vasculature and proliferative vitreo-retinopathy"

Editorial Activities:

Executive Editor for *Experimental Eye Research*, March 1998-2009.

Editorial Board Member of *Microvascular Research*, January 1999-present.

Guest Editor: *Investigative Ophthalmology and Visual Science*, 2001-present.

Proceedings of the Third International Symposium on Retinopathy of Prematurity.

Editors G. A. Luty, T. Chan-Ling, D. Phelps. Molecular Vision Press, Atlanta,

Mol Vision, 2004.

Reviewer for *Nature Medicine*, *Proceedings of the National Academy of Sciences*, *Investigative Ophthalmology and Visual Science*, *Archives of Ophthalmology*, *Current Eye Research*, *Experimental Eye Research*, *Graefes Archives of Ophthalmology*, *Ophthalmology*, *FASEB Journal*, and *American Journal of Pathology*

ORGANIZATIONAL ACTIVITIES

Institutional Administrative Appointments:

Chairman of organizing committee for the 1999 Wilmer Research Meeting.

Chairman of the Associate Professor Promotion Committee at the Wilmer Institute (2001-2007).

Chairman of the Animal Care Committee at the Wilmer Institute (2000-present).

Member of the Wilmer Support Staff Committee (2000-2007).

Chairman of the Wilmer Animal Colony Task Force which resulted in a NIH construction grant (CO-6) to renovate the Wilmer Colony.

Member, Wilmer Research Meeting Organizing Committee (1999-present).

Member of the Wilmer Research Committee (2001-present).

Member of the Rodent Advisory Committee, Johns Hopkins University School of Medicine, 2002-present.

Member, Wilmer K-grant Committee, 2005-present.

Member, Wilmer 2010 Committee, 2005-2008.

Chairman, Research Fund Subcommittee, Wilmer 2010, 2005-2008

Member, Wilmer Imaging Core Committee, 2006-present.

Member, Wilmer Full Professor Promotion Committee, 2008-present.

Director. Animal Facility Module, NIH Core Grant, 2008-present.

Chairman, Pooled Professor Fund Study Section, 2008-2009

Member, Research Building Move Committee, 2008-present
(Floor Captain, Experimental Pathology Floor)

Member, Research Strategic Planning Comm. 2008-present

International Administrative Appointments:

Program Planning Committee for the annual meeting of the
Association for Research in Vision and Ophthalmology, 1994-1997

Organizer, "Third International symposium on ROP. An update on ROP
from the lab to the nursery" In conjunction with the annual meeting
of the American Academy of Ophthalmology, November, 2003
(Anaheim, CA)

Organizing Committee of the Michaelson Society (1997-present)

Professional Societies:

Association for Research in Vision and Ophthalmology
International Society for Eye Research
New York Academy of Sciences
American Society for Investigative Pathology

Advisory Committees:

Ad hoc member of the SBIR Review group, NIH (1998).

Ad hoc member of the Visual Science C Study Section, NIH (2001-present).

Ad hoc member of the COBRE (Centers of Biological Research Excellence),
NIH (2002).

Ad hoc member of review panel, Wellcome Trust Scientific Review Board,
London, UK (1999-present).

Member RO3 Study Section, NEI, NIH, November 2002.

Ad hoc member of review panel,, Juvenile Diabetes Association Review Panel (2003).

Ad hoc member, Foundation Fighting Blindness Center Grant Review Panel (2004).

RECOGNITION

Awards:

American Heart Association Established Investigator Award
"Vaso-occlusive processes in diabetic eye" 1994

Research to Prevent Blindness, Lew Wasserman Merit Award. 1997

Paul Henkind Memorial Lectureship, Macula Society, 2003

Research to Prevent Blindness Senior Scientific Investigator Award, 2008

Endre Balazs Award for excellence in eye research from the International Society for Eye Research, Berlin, Germany 2012.

Invited Talks:

November, 1994. Invited Speaker, XI International Congress of Eye Research, Delhi. India.

April, 1995. Invited Speaker, Sickle Cell Interactions with Endothelium Symposium, Experimental Biology Meeting, Atlanta, GA.

March, 1996. Broadhurst Distinguished Lectureship, Schepens Eye Institute, Harvard School of Medicine, Boston, MA.

November, 1996. Distinguished Lecturer, Ophthalmology/Immunology Lecture Series, Casey Eye Institute, Oregon Sciences University, Portland, OR.

Invited Talks (continued):

September, 1997. Keynote Speaker, 5th International Symposium on Ocular Circulation and Neovascularization, Kyoto, Japan.

September, 1997. Invited Speaker, Juvenile Diabetes Foundation International, Oxford Workshop on Diabetic Retinopathy, Oxford, UK.

November, 1997. Loris and David Rich Lectureship in Visual Science, University of Alabama School of Medicine, Birmingham, AL.

July, 1997. Invited Speaker, International Business Communications Meeting on "Angiogenesis Targets," San Francisco, CA.

July, 1998. Invited Speaker, XIII International Congress of Eye Research, Paris, France.

September, 1999. Visiting Professor Lecture, Scheie Eye Institute, University of Pennsylvania, Philadelphia, PA.

February, 2000. Invited Speaker, Third International Symposium on Ocular Pharmacology and Pharmaceutics, Lisbon, Portugal.

June, 2000. Keynote Speaker, Korean Retinal Society Annual Meeting, Seoul, Korea.

February, 2001. Visiting Professor Lecture, Scheie Eye Institute, University of Pennsylvania, Philadelphia, PA.

September, 2001. State of the Art Keynote Invited Lecture, 37th Annual Meeting of the European Association for the Study of Diabetes. Glasgow, Scotland, UK.

December, 2001. Visiting Lecturer Pro Tempore Distinguished Lecture Series, The Cole Eye Institute, Cleveland Clinic Foundation, Cleveland, OH.

November, 2001. Invited Speaker, IX Biennial Western Eye Research Conference, Lake Tahoe, CA.

Invited Talks (continued):

March, 2002. Distinguished Lecturer, Photomedicine Lecture Series, Wellman Laboratory, Massachusetts General Hospital, Harvard University, Boston , MA.

February, 2003. Distinguished Lecturer, Louisiana State University School of Medicine, New Orleans, LA.

March, 2003. Paul Henkind Memorial Lecture, Macula Society, Naples, FI,

March, 2003. Broadhurst Distinguished Lectureship, Schepens Eye Institute, Harvard School of Medicine, Boston, MA,.

April, 2003. Distinguished Neuroscience and Pharmacology Lecturer, University of Florida, Gainesville, FL.

July, 2003. Distinguished Visiting Scholar, University of Oklahoma Health Sciences Center and McGee Eye Institute, Oklahoma City, OK.

December, 2003. Keynote Speaker, Japanese Ophthalmic Pathology Society, Fukuoka, Japan.

June, 2004. Invited Speaker. CME Meeting on Age-related Macular Degeneration, Johns Hopkins Hospital. Baltimore, MD.

October, 2004. Two Invited Lectures. Retinal and Choroidal Angiogenesis Meeting, Vanderbilt University, Nashville, TN.

March, 2005. Invited Speaker. IBC Meeting. Ocular Angiogenesis, Massachusetts Institute of Technology, Boston, MS.

April, 2005. Invited Speaker. The Ninth Annual Vision Research Conference: Imaging the Retina. Ft. Lauderdale, FL.

September 14-16, 2006. Keynote speaker. World Retinopathy of Prematurity Meeting, Vilnius, Lithuania.

Invited Talks (continued):

February 23-24, 2007. Invited Speaker. Angiogenesis 2007. Miami, Florida.

March 16-18, 2007. Keynote Speaker. Ocular Ischemia Meeting, Vienna, Austria.

September 9-10, 2007. Invited Speaker. Ophthalmic Drug Development and Delivery Summit, San Diego, California.

December 5, 2007. Loris and David Rich Lecture in Visual Science. Birmingham, Alabama.

March 24, 2008. Guest Speaker. Department of Cell Biology, Temple University, Philadelphia, PA.

April 1-2, 2008. Guest Speaker at Nanotechnology Institute, Wayne State, and also Department of Cell Biology, Wayne State University, Detroit, Michigan.

October 3, 2008. Keynote Speaker. Irish Ophthalmic Society. Belfast, UK

December 3, 2008. Guest Speaker. Visual Systems Group. Cincinnati Children's Hospital Medical Center, Cincinnati, Ohio.
